Claims 1-11 are presented for examination. The information disclosure statement filed on January 8, 2001 has been received and entered.

The preliminary amendment filed on February 26, 2001 has been received and entered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Lindstrom et al. (U.S. Patent 4,725,586).

Lindstrom et al. teach the use of a source of bicarbonate and an organic buffer N-2-[hydroxyethyl] piperazine-N¹-[2-ethanesulfonic acid] in a surgical irrigating solution. See claims 1 and 2. The ophthalmic surgery is taught in column 1 lines 9-20. The above reference also teaches the protective effect of the irrigation solution on corneal endothelium during ophthalmic surgery. See column 1, lines 35-40.
